## 🎓 EDUCATION

### Computer Science, University of Notre Dame

May 2024 | Notre Dame, USA

Minor: Innovation & Entrepreneurship, Mendoza College of Business  
GPA: 3.7

## 🧠 TECHNICAL SKILLS

C/C++

Python

Full-Stack Dev

JavaScript

ARM

OCaml

Scheme

Java

Ruby

## 📁 PROJECTS

### B-Minor Compiler, *Compilers and Language Design* [↗](#)

Sep 2022 – Dec 2022

- Constructed a working compiler that transforms C into x86 assembly.
- The project was broken down into five steps, requiring the construction of a scanner, parser, type checker, source translator, and code generator.
- From this project I was able to learn topics ranging from the abstract theory of automata to the very practical details of assembly languages.
- Made in C, Bison, and Flex.

### Dark Web Market Research, *Researcher*

May 2022 – Sep 2022

- Joined a team of students and professionals interested in the data, data transfers and threat intelligence related to illegal digital commerce on the Dark Web.
- Searched for illicit markets, and once a market was found, prepped a web-scraping bot to parse all the listings on the site to then analyze any trends within the listings via python.
- Maintained anonymity by practicing safe cyber measures, relaying on tor network, and working under a VPN.
- Worked in Linux, Python/Selenium. For more info: <https://yld.me/aPTj>

### Happiest Match Making App, *Software Engineer*

Jan 2022 – May 2022

- Developed, implemented, and tested the Gale-Shapley Algorithm to create matching making application for professors to use.
- Identified critical tasks, determined project dependencies and design considerations.
- Delivered weekly code reviews and professional memorandums detailing project progress, assessed risks and alternatives, developed prototypes, and determined new project objectives.
- Made in Python. Libraries used Pandas, ImapLib, Pandas, email, NumPy.

## 👛 PROFESSIONAL EXPERIENCE

### Brand Sales Engineer, *IBM*

May 2022 – Current  
San Francisco, USA

- Assisted IBM Northwest's Automation portfolio in their development, management and execution on strategies and tactics for closing business.
- Performed in-depth assessments of customer processes to uncover and understand the customer's business issues, in which I generated 10 leads via cold emailing/calling.
- Worked intimately with IBM's Cloud and AI solutions to prepare client use-case demonstrations and decks.
- Participated in a case study in which we pitched an IBM's Infosphere to multi-channel-based retail stores

## 🏠 ORGANIZATIONS

### Management Leadership for Tomorrow

Jan 2021 – Current

- A career prep program for underrepresented, high achieving students that emphasizes leadership and professional growth.

### Wabruda, *Vice President*

Sep 2020 – Current  
Notre Dame, USA

- All Male-black club on Campus whose mission is focused on empowering members, cultivating community, and spirituality.
- Coordinated weekly meetings and facilitated productive conversations around important social topics.
- Promoted inclusivity throughout campus by hosting intellectual discourse, video game tournaments, and social events.
